Application Instructions

Substrate Preparation

All substrates must be dry, absorbent, sound, and free from dust, paint, or oils. Any cracks or holes should be repaired with our lightweight filler GLASTER and, if needed, leveled with standard gypsum filler. We recommend using PRIMER AC for consolidation and cleaning, and PRIMER SP for damp walls, as it is specifically formulated to combat mold and bacteria.

Product preparation

The product is ready to use; if needed, dilute with up to 5–10% clean water.

Product application

Apply the adhesive directly to the back of the wallpaper or onto the wall, following the manufacturer's instructions.

Cleaning

Remove any excess adhesive from joints with a damp sponge. THE PRODUCT DOES NOT STAIN.
